

COMMUNITY DRIVEN CLIMATE CHANGE ADAPTATION

Municipality Horné Srnie, Slovakia

Authors: M. Finka, V. Ondrejicka - Municipality Horne Srnie, Slovakia / SPECTRA CE EU / SOVVA

The municipality of Horné Srnie, in close cooperation with SPECTRA CE EU at STU in Bratislava capitalising the know-how from INTERREG projects BeReady and CICADA4CE is planning and implementing effective measures (green measures) mitigating the negative impacts of climate change in the urban environment, especially with an emphasis on public spaces, spaces connected to public infrastructure (schools, social facilities, community facilities, etc.) and evaluates their impact not only from the point of view of the change in the quality of the space, but also the social impact on the local community with an emphasis on specific groups (children, seniors, etc.).

APPLICABILITY IN THE WIDER DANUBE REGION

Best practice example on implementation of bottom-up approach in planning and designing phases in the process of co-creation and co-design of the measures with close cooperation with local community, especially young people as future generation of local inhabitants.

**M100 is a flagship project, not only at the national level, but also
stands among the few initiatives of its kind in Europe**

Together, we can demonstrate that we are part of the European transformative force
generating solutions for complex issues
